

# THE JOURNEY TO BETTER HEALTH

The road to have all your health records viewable from any device and from any place.

## 1 IN 3

Consumers are burdened with providing their own health information when seeking medical care.<sup>1</sup>

14% of office-based providers electronically share patient information with other providers.<sup>5</sup>

MOST STATES HAVE DIFFERENT LAWS MAKING IT DIFFICULT TO SHARE HEALTH INFORMATION ACROSS STATE LINES.

51% of hospitals can electronically search for critical health information from outside sources.<sup>2</sup>

The number of providers a typical Medicare patient sees annually.<sup>3</sup>

The typical primary care physician has to coordinate care with

## 229

other physicians working in

## 117

practices.<sup>4</sup>

Laws are giving patients more rights to their health data.

HIPAA

MERIT-BASED INCENTIVE PAYMENT SYSTEM

21ST CENTURY CURES ACT

HL7® & FHIR®  
New technology standards allow data flow between systems.

**2019**

## GATHER AND CONTROL ALL YOUR RECORDS FROM ONE APPLICATION

- Patients access and control data from any device they choose.
- Manage family records from one app.
- Patients easily share data with anyone they choose.
- Connect and share health device data.
- Participate in research to help find cures faster.
- Connect with other patients in a learning and caring network.
- **MyLinks is now available to patients in thousands of clinics and growing every day.**

Most patients will be able to gather all their records into one application fully under their control.
