

Dear Healthcare Provider,

We're ready to provide your patient with a MyLinks® account. What's the cost? It's free! We'll show you how to join and why it's a great benefit to both of you.

About MyLinks:

MyLinks is a consumer application which provides patients the ability to gather, aggregate, manage, and share their medical information from one convenient and secure location fully under their control.

- Uses the FHIR® API to meet government requirements*
- Helps patients coordinate their care among many healthcare providers
- Patients can share access with family members to help manage their care
- Patients can give 24-hour view only access for remote healthcare/telemedicine
- They can connect mobile health devices to view/share information
- Patients can store and share advance directives/emergency contact/insurance information

***Stage 3 Patient Electronic Access Objective requires that you allow patients to access their health information using any application of their choice.**

Sincerely,
MyLinks team
