

Dear Patient,

We are now connected with MyLinks® to provide you a way to store all your medical records in one location fully under your control!

About MyLinks:

MyLinks allows you to use a PC or any device to gather, aggregate, manage, and share your medical information in one convenient and secure location.

Benefits to both of us:

MyLinks allows you to see all your records in one place to better understand your health status. This can also help you coordinate care among your healthcare providers.

With MyLinks, you can:

- Share access with family members to help manage your care.
- Give 24-hour view-only access for remote healthcare/telemedicine visits.
- Connect your health devices to view your data in one place.
- Store and share advance directives/emergency contact/insurance information.
